The exponential rise of concern, especially among the developed nations, for the environment, health and safety will have significant impact on the future development and viability of the various segments of the Rubber Industry in Asia.

APEST (Asia Pacific Elastomer Science and Technology) has established itself as a leading forum for updating on the latest developments and innovations in elastomer science and technology and appraising the industry of issues and challenges pertaining to environment, health, safety and regulatory requirements. The APEST Conference and Exhibition is a hallmark event attracting the best professional talent in the industry to openly discuss issues that will enable the increasingly Asia-centric Rubber Industry to maintain its fast paced expansion as suppliers of rubber and rubber products globally.

The APEST 2011 Conference therefore will have as its primary focus advancements in rubber technology to ensure the sustainable development of the industry and simultaneously addressing global concerns on the environment. A number of innovative materials and ‘green’ approaches have emerged in raw materials, processing, machinery and manufacturing practices that are in compliance with the exacting demands of sustainability.

The Conference will feature presentations from an array of 25 international technical experts from various disciplines who will share their knowledge on science and technology appropriate for the future needs of the rubber industry. Some 350 participants and exhibitors associated with the global rubber industry are expected to attend this event.

Conference Sessions
The Conference sessions will include presentations and discussions as follows:
- New dynamics of rubber production, consumption and sustainability.
- Use of renewable energy in the rubber industry, regulatory issues, innovative materials and grades of rubber including epoxidised NR.
- Consumption trends and technical developments in latex medical products.
- Perspectives in compounding and developments in tyre technology and automotive products.
- Extreme weather affected and elastomeric Isolators.
- Economics and opportunities and incentives for NR production.
- Investment opportunities in rubber product production and manufacturing of rubber products to meet the growing global demand.
- Panel Discussion

Supporters:
The Conference is organized with the support of the Thai Rubber Association (TRA), the All India Rubber Industries Association (AIRIA), the International Rubber Study Group (IRSIG), The Plastics and Rubber Institute Malaysia (PRIM), International Institute of Synthetic Rubber Producers (IISRP), Polymer Association of Thailand (PST), Thailand Rubber Glove Manufacturers Association (T.R.G.M.A.), Thai Latex Association (TLA), Office of Replanting Aid Fund (ORRAAF), Department of Agriculture/Rubber Research Institute of Thailand (DOA/RRIT), Malaysian Rubber Board (MRB) and etc.
Organizing Committee:

Chairman: Dr. Sanit Samosorn, Editor/Publisher of The Rubber International Magazine, Managing Director of T.R.I. Global Co Ltd. (Former Chairman of Rubber Research Institute of Thailand and Deputy Director-General of Department of Agriculture.)

APEST Directors: Mr. C. F. Robert (Malaysia) Managing Director, ta plus asia-pacific s.b. and CDR STAT-S-TECH SERVICES S.B., Chairman of ISO/TC 45 Rubber and Rubber Products

Advisers: Dr. Pongsak Kerdwongbundit, President of Thai Rubber Association

Scientific Advisers: Dr. E. L. Ong (Malaysia) Technical Advisor, Kossan Rubber Industries S.B, Chairman ISO/TC157 - Mechanical Contraceptives, Ex Deputy Director-General of Malaysian Rubber Board and Deputy CEO, Malaysian Rubber Export Promotion Council

Tyre Technology Adviser: Mr. Zachariah George (India)

Registration Fee/Booth Allocation

Registration Fee: USD 450 /person (Special discounts for organizations/group with 10 and above persons)

Booth (shell scheme): USD 850 (2 x 2 sq.m.) and USD 1,200 (3 x 2 sq.m.)

Venue Hotel: Sofitel Centara Grand Bangkok, Thailand (www.sofitel.com)

Accommodation:
- Chaophraya Park Hotel-Deluxe Single with ABF, THB 2,400 (USD 78)
- The Emerald Hotel-Superior Single with ABF, THB 2,350 (USD 77)
- Maruay Gargen Hotel-Deluxe Single with ABF, THB 1,625 (USD 53)
